Title: METHOD AND SYSTEM TO GENERATE A LISTING IN A NETWORK-BASED COMMERCE SYSTEM

IN THE SPECIFICATION

Please amend Paragraph 46, on page 20 of the specification as follows:

The disk drive unit 316 includes a machine-readable medium 324 on which is stored a set of instructions or software 326 embodying any one, or all, of the methodologies described herein. The software 326 is also shown to reside, completely or at least partially, within the main memory 304 and/or within the processor 302. The software 326 may further be transmitted or received via the network interface device 320. For the purposes of this specification, the term "machine-readable medium" shall be taken to include any medium which is capable of storing or encoding a sequence of instructions for execution by the machine and that cause the machine to perform any one of the methodologies of the present invention. The term "machine-readable medium" shall accordingly be taken to included, but not be limited to, solid-state memories, and optical and magnetic disks, and carrier wave signals. Further, while the software is shown in Figure 15 to reside within a single device, it will be appreciated that the software 326 could be distributed across multiple machines or storage media, which may include the machine-readable medium
